Turning data into actionable knowledge

- Humanitarian organisations have managed to improve their data policy, but there is still work to be done.

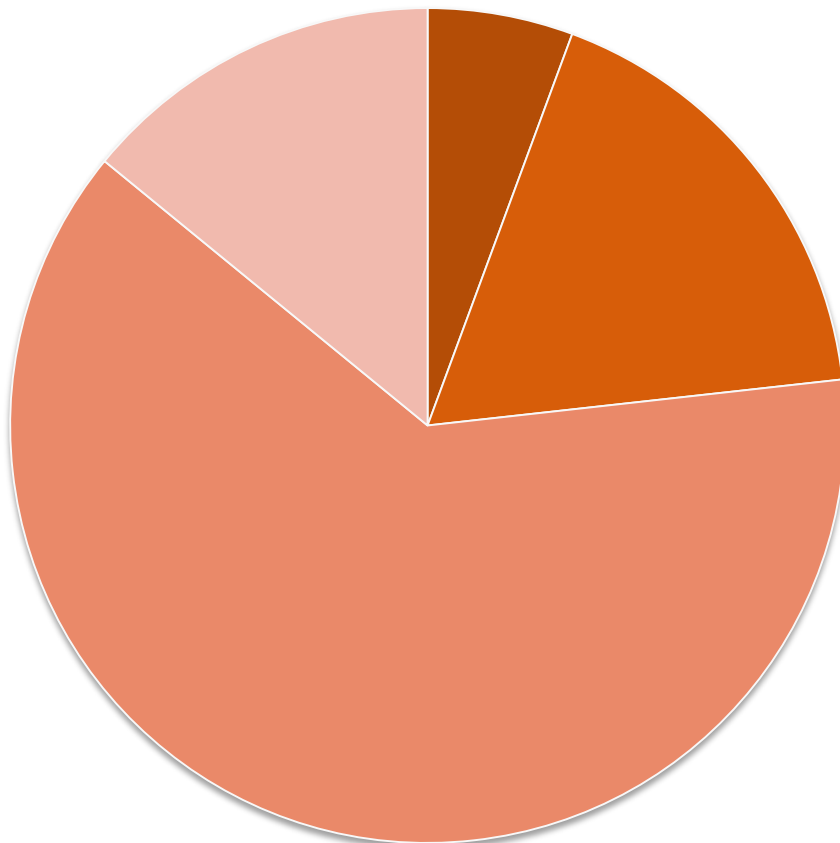

- The key challenge is dealing with all the quantity of data coming in...

- And turning it into the information needed for the operations

Who are you?

- 76 organisations
- 42 Women / 103 Men

- association
- Entreprise
- ONG/OI
- Université/Recherche

Who are we?
