THE 8TH HUMANITARIAN &
DEVELOPMENT DATA FORUM

Use the more existing data as possible and try to point out what is really relevant

Planning data analysis according to intended use

Not wasting resources

Doing more with less

Collecting only what is needed

Small is beautiful

Take only useful data For a specific project

Avoid duplication

As much as necessary, eliminate unnecessary data

Avoid useless practices

Avoid not relevant data

Thinking before clicking

Light carbon footprint

Rationalise IM systems

Be aware of the purpose of the data

Rationalisation

Do something with it if you collect it

Collect/manage only the relevant data
